

Sea Tel[®] 6006Ku Antenna

When the going gets rough, Sea Tel[®] keeps going

Broadband-at-Sea

The 6006Ku Antenna is similar to the 4006 with a larger 1.5-meter Ku-Band maritime VSAT antenna for SCPC, broadband, or hybrid networks.

Because of its size and power, the 6006Ku features a higher transmit and receive gain (about 2 dB) which allows substantially increased thru-put connections depending on your data transfer requirements.

The 6006Ku is suitable for file and image transfer, video conferencing, e-mail, Virtual Private Networks (VPNs), and database backup.

COBHAM Antennas

- Antenna: 1.5 m/58" D ring focus
- Radome: 1.93m/76" D x 2.06m/81" H.
- Weight: 400 lbs. approx.
- Polarized Feed: Linear Cross-pol or Co-pol with Automatic Control
- Rotary Joint: Allows >180 degrees of feed rotation
- BUC: 4 W is Standard & 8 W Optional
- Transmit Gain: 45.1dB @ 14.2 GHz
- Receive Gain: 44dB @ 12.0 GHz
- Roll/Pitch Amplitude: +/-25 degrees roll; +/-15 degrees pitch
- Pedestal Type: 3-axis: Level, Cross-Level and Azimuth
- Transmission rate is compatible with many different types of modems, networks and services.
- IP access to the Internet and corporate networks enabling fast downloads of large data files and e-mail
- Unlimited data transfer allowance
- High Quality of Service (QoS) for voice
- Easy stand-alone or network compatible installation
- 24/7 customer care and technical support
- 1-year warranty on parts, 1-year labor
